

# BURST BOTTLE

The Burst Bottle is a re-usable burst simulation bottle, that can be applied during normal burst test procedures in a filler line.

The Burst Bottle collapses under filling pressure, causing the sensor to detect a bottle failure.

## Advantages

- ❖ Innovative quality and safety management
- ❖ Fully reusable
- ❖ Consistent and reliable test protocol, with high repeatability
- ❖ No glass fragments in the line
- ❖ Saves cleaning time, easy to use
- ❖ Generic test bottle, suitable for all EUR fillers:  
Long or short filling pipe, Sondes

Storage in 70% Ethanol

- ✓ Easy
- ✓ Clean
- ✓ Safe

Exclusively available for **ABInBev**

## Complete Package

The Burst Bottle comes with a full maintenance and cleaning package:

- ❖ Toolkit
- ❖ Wall-mountable Cleaning and Storage Canister
- ❖ Instructions for cleaning and assembly
- ❖ Video instruction for cleaning
- ❖ Application movie (ENG, ES)
- ❖ Spare parts

## Customized shape

The Burst Bottle is an exact copy of the normal bottles in the line. A large variety of differently shaped bottles are available.
